

# Requesting more testnet CAPE

If you skipped the faucet request step during wallet setup, or want to request additional testnet CAPE tokens, you may request additional zero-value testnet CAPE tokens for any CAPE address from Espresso's faucet at any time.

Step 1: Go to "Faucet" section in the left hand side menu.

Step 2: Enter your CAPE address (obtained from the "Account" → Address section). Click on "Request some CAPE."

Your CAPE tokens will appear in the My Wallet dashboard section.
