

Authors from Llama: [@MatthewGraham](#), [@Elliott](#) and [@MSilb7](#).

Llama is glad to present the very first Aave Treasury Report. A fresh Treasury report will be published here each month providing insight into performance of Aave. Live tracking data is available via the [Dune Dashboard](#).

The Financial statements are set out per reserve showing the income generated from the start of 2021 along with expenses (not that there are many).

We have also presented a token flow statement. It should be noted that this combines all reserves, but for clarity we have split out each reserve into its own statement and provided a consolidation to show the total movement.

We are working to build out a balance sheet for our next iteration of this report and we welcome any feedback.
