

Delegating EIGEN

Follow the steps below to delegate EIGEN tokens to an EigenDA node operator.

Step 1: Visit <https://app.eigenlayer.xyz/restake/EIGEN>

Step 2: Enter the amount that you'd like to deposit.

If you have restaked ETH and you have already delegated it to an operator, you're done - your EIGEN is automatically delegated to that same operator.

Step 3: Once the deposit is successful, click on the Delegate button.

Step 4: Search for operators via their name or Ethereum address. Click on the Operator's tile to view their Detail page.

Step 5: Click Delegate to initiate a delegation of all your staked assets to that operator [Previous Change Your Delegation](#)
