

Too much corruption within the DAO, it needs a new and fresh look so that people can actually adopt \$ape and look at a brighter side of Apecoin DAO. Buying NFTs or funding over charged AIPs not gonna onboard new people.

So what if it's just me and my bike, bunch of merch and whole load of things funded by the DAO to travel major asian crypto cities by road and document the journey where I spread \$ape to the people I come across!?

Total budget might get under \$20k I suppose, can include additional things like dedicated laptop, camera, gopro, drone and getting light weight merch such as stickers, pins, badges etc. So \$25k approx.

Lowkey wanna make an AIP around but want to know people's sentiments specially at this time where the DAO stands
