For every category you rank, you will increase your chances of winning part of our 4000 OP prize pool. There will be 40 lucky winners and the more you rank the more likely you will be one of them. Deep dive into the rules at the end of this [post](#).

Why are we doing this?

Pairwise's goal is to make voting in Retro Funding rounds simple and fun.

This massively improved version of Pairwise is a new experiment where we give OP Delegates, OP Token holders, RF4 Recipients as well as RF4 Badgeholders an opportunity to signal their preferences in Retro Funding 4 (RF4). Each of these four stakeholder groups will have their own voting results; we are excited to see how they compare!

We hope this effort will not only explore a new voting methodology for ranking Retro Funding projects, but also significantly promote the work done by all the projects accepted into RF4. We want to showcase the value these projects provided to the Superchain to an audience beyond the ~130 badgeholders. This way, the valuable contributions of these public goods projects will receive the attention they deserve from a much larger group of people.

Step-by-Step Guide to Pairwise
