

I think the UNI team is doing a great job. Still, we are all aware that we must constantly update ourselves. For this reason, I miss in this forum proposals for new products or developments.

Any ideas:

- 1.- UNI portfolio development. UNI Wallet
- 2.- Development of different interfaces by levels of user knowledge.
- 3.- Training for community members and users on the different UNI products.
- 4.- Inclusion of the platform for buying / selling NFTs
- 5.- Analysis tool of the different tokens of the platform.
- 6.- Investment strategies.
- 7.- Support for all languages
- 8.- ...

Please let us all continue

Thanks and greetings to all
