

Dear Arbitrum Community,

I hope this message finds everyone well. I am writing on behalf of [Gelato](#) to address a recent oversight regarding the Arbitrum Airdrop. We have been supportive and active participants within the Arbitrum ecosystem and are sincerely invested in its growth and prosperity.

To provide some context, we diligently worked to claim the ARB tokens for all our nodes. However, we missed claiming from two of our addresses:

0x29d33FCD30240d55b9280362599d5066c1a2cf10

0x16ae10a1A1c23E5F1c21C71894F769a444400a11

By the time we realized the oversight and attempted to claim, the window had unfortunately closed. We understand that the unclaimed tokens have been moved to the DAO treasury.

Given our genuine mistake and commitment to the ecosystem, we kindly request the community's feedback on potentially reclaiming the ARB tokens associated with the mentioned addresses. We are fully aware of the processes in place and respect the decisions made by the DAO. This is merely a humble request for consideration.

The total unclaimed ARB from these addresses amounts to roughly \$3,000 (according to airdrop alert sites).

We would appreciate any feedback, insights, or recommendations from fellow members on this matter.

Thank you for your time and consideration.

Team Gelato
