

Happy Pizza Day ApeCoiners !

Today, we're celebrating the perfect blend of two incredible creations: Pizza and Bitcoin. It's a day where we honor the origins of Bitcoin and the legendary story behind the first-ever Bitcoin transaction: the purchase of two pizzas for 10k BTC.

The main interesting thing is the guy who accept the offer, who value vision.

Just like the perfect pizza, our community is made up of diverse and unique ingredients that come together to create something extraordinary.

Keep it up.

Happy pizza day

-Mr. Hype
