

Hi guys, My AAVE happened to be stolen! I need a help, my 4500X AAVE STK was transferred by someone in the mining pool

[Ethereum \(ETH\) Blockchain Explorer](#)

### **[Ethereum Transaction Hash \(Txhash\) Details | Etherscan](#)**

Ethereum (ETH) detailed transaction info for txhash 0xf5344c627732ff0f9997d7740390945b537e0b115cad0fc59d5b7979456ae81f. The transaction status, block confirmation, gas fee, Ether (ETH), and token transfer are shown.

I can't understand how he did it, he also transferred my 0.2ETH at the time of the pass, but in the AAVE mining pool, he needs 10 days to unlock the mining, I only added AAVE ICO in 2017.

This is my DeBank wallet history

A multi-chain portfolio tracker that supports the largest number of DeFi protocols.

I hope the community team can freeze the transaction funds. Now there is a 10 day cooling time or the community votes. I can provide any evidence. If I can freeze or recover the money, I am willing to donate all the money to the AAVE community. I hope the administrator can help me.
