

Hello \$APE Community!

This is the Ape Drops team that brought you the two Snoop Dogg mixtapes this week on apedrops.xyz (if you don't believe me, you can see the first Ape Drops contract deployed by apedrops.eth here: [ADSNP | Address 0x647037de761696d224333778e69082ce3b742242 | Etherscan](#)).

We've done four drops so far (2 by snoop and 2 done by members of the community) and our goal is for Ape Drops to become the destination for artistic expression in the \$APE community. Long twitter thread incoming on how we'll achieve that goal, but we really wanted to get more people involved.

This post is to start a general discussion on what future ape drops you'd like to see. We're looking for creatives (artists, designers, musicians, etc) in the community that are interested in working with us on a drop. We know that following in Snoops footsteps is kinda intimidating but what's most important to us is bringing the best of the community to Ape Drops, so don't worry if you don't have a million twitter followers. We're so stoked to be a part of this amazing group of people and hope you've all enjoyed the drops so far!
