

I apologize in advance if I'm not posting in the right category but I've wanted to share that we're holding a Panel & public Q&A session on the RWA Market Wednesday at 16:00 CET/15:00 UTC.

We'll have [@stani](#), Centrifuge CTO Jeroen and myself speak. [@anna](#) will be moderating and also share an update on what's going on in the market right now. In advance, I've also wanted to ask the community what you'd like us to cover in the call. Please reply to the thread if you have any requests.

I'd love to see as many of you as possible there as our goal for this crowdcast is to get Aave governance more familiar with the market as it stands today and hopefully discuss where it should be going next (hint: personally I'd love to see us move as much of the governance decisions as possible over to \$AAVE token holders as soon as possible!).
