

# Build with Argent

\$Argent is the original smart wallet. We pioneered "Guardians" for social recovery, and have been using Account Abstraction since 2018.

/\$\$These docs will help you optimise your dapp for smart wallets, enabling you to offer a vastly improved experience to your users.

/\$\$

ArgentX - The first wallet on Starknet

/\$\$ArgentX is the first open-source wallet on StarkNet powered by native account abstraction.

/\$\$Available as a browser extension across different browsers' web stores, Argent X helps you create, manage, and connect accounts to decentralized applications built on StarkNet.

/\$\$

Argent Web Wallet SDK – no download, no seed phrase onboarding

/\$\$No wallet? No problem.

/\$\$If your target audience doesn't have a crypto wallet, this is for you. They'll create a wallet with an email address and password. No plugin. No download. No seed phrase.

/\$\$It's the fastest, most familiar way for a normie audience to use your dapp.
