

Release Notes

Release Notes

March 14, 2024 [v0.8.1]

Features:

- Builder Address Labeling
- : There is now automatic decoding of major block builders.
-

?

- Rollup Address Labeling
- : There is now automatic decoding of major rollup addresses.
-

?

Fixes & Enhancements:

- Home Page Refinements:
- Updated the defi swap tile link and changed blob base fee to display to WEI.
- Blob Decoding:
- Fixed optimistic blob decoding.
-

March 12, 2024 [v0.8.0]

Features:

- Home Page EIP-4844 Support:
- Added new summary tiles for blobs.
-

?

- New Blobs Tab:
- EIP-4844/blob transactions have a blob tab providing further details on the transaction.
-

?

- Base Rollup Decoding:
- Easily view decoded Base rollups.
-

?

Fixes & Enhancements:

- Enhanced Rollup Tab:
- Rollup tab will work for both calldata
- and blobs.
- Eigenlayer Added to Featured Addresses:
- Easily view what is happening with Eigenlayer.
-

?

- Tool Tip Refinement
- : Improved tool tip UX on the Ethenow home page.
-

February 28, 2024 [v0.6.0]

Features:

- New Home Page:
- New visual and tiled summary of what is happening in the Ethereum Mempool.

February 21, 2024 [v0.5.0]

Features:

- Updated Filter Panel
- : Updated UX for filters.
-

?

- Marketable Transactions Toggle:
- New view to see the number of recent transactions in the mempool priced to be included in the next block.
-

?

- Private Transactions Only Checkbox
- : Filter for only private transactions by checking a box.
-

?

- 4-Byte Signature Filter:
- Added filter for contractmethodName
- .
- Event Signature Filter:
- Added filter for logtopic0
- .
- Type-3 filtering:
- Added in type 3 / 4844 / Dencun ready filtering.
-

January 24, 2024 [v0.4.0]

Features ([video overview](#)):

- Sharable Filters:
- Saved filters now have unique URLs so that you can share them with your community.
- Transactions Since Genesis:
- You can now access comprehensive on-chain transaction data back to Ethereum Genesis.
- Address Labeling:
- Automatic decoding of over 31 new addresses and method signatures.
-

?

Fixes and Enhancements :

- Enhanced Optimism Bridge Call Decoding
- : Contract calls made to the Optimism bridge are now decoded.
- Naming Update:
- 'My Searches' is now 'My Filters' for added clarity.
- Refined Navigation:
- Green 'Newer Blocks' count bar now brings you to the top of the chain via a click.
- Persistent Filters on Refresh:
- Unsaved filters will now persist even after a refresh. For long term usage, save them to your account.
- Improved Filter Application
- : Refined block and transaction selections when applying and clearing filters for improved UI.
- UX Improvements:
- Improved routing to a more friendly 404 page, filter use and data consistency, and error messaging.
-

January 10, 2024 [v0.3.0]

Features ([video overview](#)):

- Rollups
- : Easily view decoded Optimism rollups.
-

?

- Private Transaction Labeling
- : Visualize private transactions and identify bundle patterns within a block with the new block view labelling feature.
-

?

- Empty Block Indication
- : Empty blocks are now labeled for better visibility.
-

?

- V1 Mobile Support
- : Ethernow can now be accessed on mobile devices. For full functionality we recommend using the desktop version of Ethernow.
-

Fixes and Enhancements :

- Multi-Tab Login/Logout
- : Logins and logouts are now seamlessly synced across multiple tabs for a more secure experience.
- UI Refinements
- : Added margin to prevent overlap with the feedback button and gas chart.
- Updated Field Naming
- : Replaced references of 'created by' to 'from'.
-

December 18, 2023 [v0.2.6]

Features ([video overview](#)):

- Private Transaction Filtering:
- View private transactions as they appear on-chain with a simple click of a button. With the dedicated Private Transactions filter, view will be updated to only display the private transactions in each block as well as their relative ordering within the block.
- Instant Access to the Mempool Data Archive:
- Removal of API key for streamlined access to the Blocknative Mempool Historical Archive.
- Block Highlighting:
- Easily spot blocks that match inputted criteria.
- Saved Filters:
- Unsaved filters will stay put until fully logged in and ready to save.
-

Fixes and Enhancements:

- Maintained Block Position:
- Current position in the block feed remains when switching from block view to live mempool view.
- Removal of Phantom Matching Transaction Blocks:
- Fixed issue of seeing 0 matching transaction blocks when no filter is applied.
- Improved Saved Searches:
- Rename tabs and refresh saved searches without any unexpected tabs jumps or surprises.
- Clarity in Gas Calculation:
- Renamed "estimated gas needed" to "base fee" for better clarity.
- Enhanced Pending Event Display:
- Reorganized the display of pending events to make it more intuitive for the user in the transaction journey.
-
