

# RAY Token

The basic tokenomics for RAY are explained below: \* 555 million RAY hard cap. \* The total RAY mining reserve consists of 34% of all tokens, or 188.7m RAY \* Emissions will last for approximately 36 months, with halvings occurring every six months. A halving means the budget for maximum tokens used for emissions during a 6 month period will halve relative to the previous period. The full amount of the budget will not necessarily be emitted during that period. \* 0.03% of trading fees will be used to buy back RAY Always double check the RAY mint address before interacting! RAY Solana SPL address: 4k3Dyjzvp8eMZWUXbBCjEwvSkkk59S5iCNLY3QrkX6R

## Allocation:

Allocation Percentage Amount (RAY) Mining Reserve 34% 188,700,000 Partnership & Ecosystem 30% 166,500,000 Team (1 - 3 Year Lockup) 20% 111,000,000 Liquidity 8% 44,400,000 Community & Seed (1 Year Lockup) 6% 33,300,000 Advisors (1 - 3 Year Lockup) 2% 11,100,000 Total 100% 555,000,000 Locked Token Distribution \* Team, advisors and seed (25.9% of total) are fully locked for the first 12 months and unlock linearly each day over months 13 - 36.
