

I found an interesting situation.

Look at 16574202 block. <https://etherscan.io/txs?block=16574202&p=1>

MEV Bot: 0xb0...8bE make a sandwich.

Front run tx: 0x4b962fa56c0200b05af6484db2aee42e640d0365bae92a007a0ad1a9c697fa9d.

Index: 76.

Back run tx 0x4b962fa56c0200b05af6484db2aee42e640d0365bae92a007a0ad1a9c697fa9d.

Index: 78.

miner tips from another transaction.

Miner tip tx: 0xe018ce56a016764170244d785b8a446a2858b6868afbb95ef346dc425a6c6529.

How do you do this? how to make sure there three tx in a block ?

Is this a new way of miner tips?
