

Hello everyone,

Today I would like to talk about gasless Voting on Aave.

Why?

Because the voting system is extremely important and relevant to the whole DAO we need more people to be involved in votings. The problem is that probably most small holders won't vote because of high gas fees on chain.

That's why I would like to recommend and take a look at Bancors try with gasless votings.

See here full explanation: [UPDATED: Gasless Voting via Snapshot - BIP Discussion - Bancor Governance Forum](#)

Implementing something similar would probably get us more votes for pending AIPs. And the more people are voting the more realistic the votes can and will be. As not a few single whales are gonna decide which way Aave should go.

What do you think?
