

Hello guys,

My name is Tiago Al-Alam and I'm an administrator at Archimedes Staking Pool [archpool.io](https://archpool.io).

I am preparing the infrastructure to participate in the second phase of the incentivated testnet.

Please, isvEnclaveQuoteStatus = CONFIGURATION\_AND\_SW\_HARDENING\_NEEDED status is acceptable?

My server is displaying this status after updating bios that Dell made available on July 13th.

Thanks!!
