

I'm Kato from Slash Fintech and DeSci Japan.

We are developing "Slash Payment" that integrates crypto payments and DEX.

[Slash Payment / Pay with Crypto Without Fees. Permissionless merchant registration](#)

[Slash Payment / Pay with Crypto Without Fees. Permissionless merchant registration](#)

Slash is the best crypto app to pay with crypto and accept crypto payments. Permissionless merchant registration and easy introduction of crypto payments.

- Supports 5 blockchains and allows automatic swaps and payments with over 1400 types of crypto currency.
- Reduce volatility by receiving sales in stablecoins.
- It can be started within 2 minutes, so set it up for EC sites and shops.

[Introduction](#)

■Our proposal

1 Businesses that have introduced Slash can receive sales in DAI, so they will invest the sales in SAKURA DAO.

2 Payment can be made with DAI at bars and sushi restaurants in Japan, promoting the generalization of DAI.

- 14 places in Japan you can use crypto payments with slash

4 We will hold events and promote promotions with Japanese stablecoin and RWA businesses.

5 DAI investment platform with Slash Payment. (Deposit in 1400 types of cryptocurrencies and record sales in DAI. Invest in SAKURA DAO.)

■Possibilities in Japan

Payment/investment using DAI is considered to be very suitable for educating the Japanese market about stablecoins and RWA.

Many Japanese individual investors are interested in investment products that provide stable income gains, and are investing in crowdfunding and social lending.

Although there is default risk in RWA, the possibility of DAI investment in Japan will greatly increase with transparent management and information disclosure.

I would like to explore various possibilities such as reinvestment in the science and art markets, sales and marketing to institutional investors.

Let's create DAI ecosystem in Japan with the generalization of DAI payments!
