If you see an error similar to the one above, it means you are calling a method on the Pimlico API that is not supported. The most common reason for this is using the Pimlico API endpoint for standard public Ethereum JSON-RPC methods. As a reminder, the Pimlico API only supports bundler and paymaster methods.

Possible solutions

Make sure you are using a standard RPC endpoint for public Ethereum methods and the Pimlico API endpoint for Pimlico-specific methods.

...

```
import{ createPublicClient, http }from"viem"
```

```
constpublicClient=createPublicClient({ transport:http("https://api.pimlico.io/v2/sepolia/rpc?apikey=YOUR_PIMLICO_API_KEY") transport:http("https://rpc.ankr.com/eth_sepolia") })
```
