

Hey everyone

Charlie here from team Agora.

Really appreciate everyone for trying out Optimism Agora Beta with the first test proposal and giving us such helpful feedback.

We've been reading all the posts, comments, and messages on Discord/Twitter/Discourse, and really appreciate the thoughtful responses. Special thank you to [@lavande](#), [@diligite](#), [@TanBinh](#) and the other mods for helping us triage, loop into convos and surface great feedback.

The feedback has been invaluable as we work to improve Agora and build the best governance system for Optimism. Over the last week, we've consolidated a list of todos and also implemented some changes and feature improvements based on what we've heard so far (see below!).

As many of you have pointed out, there's still a ton of work to be done, and improvements to be made. Agora is far from a complete product yet.

So, in that spirit, wanted to kick off this thread to consolidate: feedback, feature requests, suggestions, anything really that you want to see built. At the end of the day, we are committed to supporting the Optimism ecosystem — and plan to build in the public.

Our first set of changes from last week,

Feb 27th change log:

- Fixed Quorum calculations
- Confirmed that all known multisigs are able to submit votes
- Improved voting & delegation on mobile
- Improved UI clarity on the cast vote dialog
- Added delegation & voting loading states
- Added a profile dropdown to display more information:
 - Who you delegated to
 - Your voting power
 - Your token balance

- To no credit of us, this is all [@TanBinh](#)'s work: [FAQ on how to use Agora](#)

There's still a bunch of feedback that we haven't had the chance to implement yet, we plan to release another update in the next few weeks to follow up on those. In the meantime, please keep the feedback coming - it really does help shape the future of Agora for Optimism.

My discord is also open: zcf#9299 for any DMs (please don't hold back, love all the screenshots, suggestions, and drawings!
)
