

Hi Arbitrum Delegates,

I wanted to give notice that this Friday, July 26th at 8:30 PM UTC Tally is planning a database upgrade to:

- improve performance
- lower costs
- enable new search features

For about six hours, onchain data about proposals and voting power will be delayed and users will be unable to:

- create proposals
- edit or create profiles

We apologize in advance for any inconvenience and look forward to improving the user experience on Tally.
