

So I joined Osmosis and got my pools set up, started learning about staking more there on Keplr and came across the Secret Network and its token. Been reading all morning and I am sold. So I find the bridge site. Swap some Eth from my MM wallet to sEth on Kplr. Wow no prob! Easy. .075 Eth swapped I wanted to convert to SCRT. I head over to Swap but it will not let me. So I figured I need to SEE my sEth but I have no SCRT to pay the tiny fee so now I have spent a couple hours trying to get SCRT. I do not want to join a questionable exchange (gate.io) etc to buy SCRT.

Ok so this part is weird. I see on reddit that you can join the Secret Network discord server and go to the pizza sub room (not a big discord user so I am not really sure how it works) and someone can spot me a tiny bit of SCRT, but when I try to join the discord chat room after waiting 10 mins it just disappears and looks like I have been booted and the server is not listed with my others.

So I have a few hundred dollars of sETH that I cannot see or move from my Keplr wallet. Please help!
