

Hello, dear Optimism Collective.

About me:

I'd like to introduce myself: I am Briguit Reinaldo, also known as [CriptoMommy](#), founder of [Women Biz](#), an active contributor to the Optimism community as [Speaker in different universities](#), currently wanna - be-ambassador Optimism, and a beneficiary of retropgf3.

Since 2023, I have been actively learning, participating, and sharing about and within our community.

About Bootcamp "Women in Web3"

This year, I decided to promote our community through my passion: education. To this end, together with the Women Biz community, we have launched the ["Women in Web3" bootcamp](#), a 6-week training program designed to attract more users to our ecosystem. The bootcamp is free in Spanish.

In this project, we have integrated tools from our community such as:

- Mirror
- Praise
- 1inch
- Charmverse
- Thirdweb3
- Unlockprotocol
- Zora.

Each week, participants undertake practical cases and face weekly challenges to solidify their learning, creating a gamified educational experience in the world of web3.

Examples: [Propuesta de tokenización de libros u obras literarias](#) — Valeria Valentina

This week we focused on Governance, taking our Optimism community as a case study. During this session, we are teaching about the Optimism forum and how to add value to our community.

The project will culminate in a hackathon aimed at supporting the [retrofundig](#) goals, seeking to attract new projects, especially in the areas of 1) governance and 2) onchain development.

The hackathon will take place on Saturday, April 27, in Lima, Peru, with 200 attendees and the expected participation of 17 teams. 190 women from 16 LATAM countries are participating in this bootcamp.

I would like to invite other members of our community to collaborate on this project. We are still looking for allies, judges, and prizes for the winners of the hackathon.

For more details or to collaborate, you can contact me through my Telegram: [@criptomommy](#).
