

During the last few days, KISS AVC members have discussed at length, in private, the recent events associated with [@Bonapublica's NO vote on MIP102-SP26](#).

While every AD has the right to vote according to their conviction, we believe that [@Bonapublica](#) has acted in a way that is adversarial towards the KISS AVC.

1 Bonapublica has not informed KISS about their intention to vote NO, before voting onchain. 2 Bonapublica has not tried to stimulate a healthy discussion within the KISS AVC regarding SP26, with the goal of staying united on this topic, if possible. 3 Bonapublica has voted against a MIP102 which the KISS AVC has developed over the course of 6 months and to which Bonapublica has contributed directly until the very end.

We have updated delegate requirements with a new set of communications rules that would prevent this types of behaviors in the future. See [here](#).

We reserve the right to ban ADs whose actions and votes do not, in the opinion of the majority of AVC members, adhere to the spirit of the new communication rules in similar situations in the future.

For the time being, we issue a warning to Bonapublica: a similar behavior in the future will not be considered as adhering to our updated set of communication rules.

Finally, we urge MKR holders supporting the KISS AVC to delegate their MKR to other ADs following KISS (Blue, vigilant or Penguin Soldier) if they wish to support MIP102c2-SP26.
