

I am preferring this communication mechanism over say, Skype. I want to move research-internal discussion to here.

I have two requests.

(1) I wish to make this messageboard password protected. Or requiring a verified login, etc. I desire this because I don't want Twitter/Coindesk looking over our every thought and misstep. For example, I want to avoid the case of some researchers publicly disagreeing with Vitalik and it gets a little testy to morph into the coinbase/ethnews headline, "Ethereum research split! Fork coming?"

(2) I want to change the URL to something like <http://research.ethereum.org> or <http://rboard.ethereum.org> .

I volunteer to take the lead on both changes.

Comments appreciated.
