Hi all, as you may have heard, we're postponing the Shockwave Alpha upgrade until May 11th. Per discussions with SCRT Labs, an issue was discovered while going through the new upgrade process on testnet, which will require a bit more time to resolve. The issue is not related to the new features being introduced by Shockwave Alpha, but simply the new process by which the upgrade is applied.

If you have questions about this, feel free to drop them in here!
