

Are you interested in zero-knowledge proofs? Do you want to implement it but you're somehow stuck?

We're building Zero-Knowledge Proof API / SDK, check our Github repo (work in progress)

https://github.com/zksdk/zkapi_mvp

We made available a limited version for personal use, if anyone interested in implementing it for commercial use or for a specific use-case, please feel free to contact us! Any feedback is welcome.
