

Individual Posts

Description

This dataset provides the individual posts in the Lens Protocol that are sent between 01.01.2024 and 04.04.2024. It is important to note that because the content of a post can be any multimedia, we have decided to not put the data directly, rather have a column that contains the URI of the content.

Schema

- call_block_time- timestamp of the post creation
- profileID - id of the profile which created the post
- contentURI - URI that contains the content of the post
-

Potential Use Cases

- Profanity Checker
- Sentiment Analysis
-

Use example

...

Copy from `giza_datasets` import `DatasetsLoader`

Usage example:

```
loader=DatasetsLoader() df=loader.load('lens-posts')
```

...
