

Hi i am not sure what's going on

Yesterday i lost my ETH abriturm supply from my aave account. I can't see the transaction history from the history transaction page but i noticed an unknown transaction from my trust wallet history:

[Arbitrum L2 Explorer](#)

[Arbitrum One Transaction Hash \(Txhash\) Details | Arbitrum One](#)

Arbitrum (ETH) detailed transaction info for txhash

0x194c9abebc88c6cad4b0aeebd31a2e10956b72f845b70525a45a91a7c6b62835. The transaction status, block confirmation, gas fee, Arbitrum, and token transfer are shown.

is anybody can help to figure out what's going on? is my account being compromised?

Best regards
