

Install LI.FI SDK

Integrate our SDK to your dApp/Wallet/swap UI This package allows access to LI.FI API, which finds the best cross-chain routes on different bridges and exchanges. The routes can then be executed via the SDK.

Our API is free to use but rate-limited. If you need more requests per second [please ask for an API key](#) .

Installation

We recommend installing the SDK via [npm](#) or [yarn](#) .

...

Copy `npm install --save @lifi/sdk`

...

or

...

Copy `yarn add @lifi/sdk`

...

As an integrator, you can monetize your LI.FI SDK integration and collect fees. See our [monetization guide](#) for more information. Contact our [business partnerships team](#) to discover how you can partner with us and integrate [LI.FI](#) into your platform. The LI.FI SDK currently provides support for [Ethers v5](#) . We will soon be supporting [Ethers v6](#) with upcoming updates.

Next steps

- [Set up the SDK](#)
- [Request a Route](#)
- [Execute a Route](#)
