

Hi everyone!

It is a pleasure for me to kick off this communication thread as a Delegate in the Governance of Optimism. I'm excited to be part of the collective and contribute to the development of meaningful decisions.

In my [Delegate Statement](#), you will find more details about my background and the reasons that led me to get involved in Optimism's governance. My choice as a delegate is rooted in my strong belief in decentralization and governance as driving forces for positive change. This conviction is coupled with my deep passion for public goods, impact, and innovation in the ecosystem.

Although I am in the early stages of my journey as a delegate, I aspire to have the principles and values that guided me here clearly reflected in my decisions and future discussions.

This communication thread will not only be a space to announce my votes, but also a place to share and discuss the reasons behind my decisions. My goal is for you to follow my learning process and actively participate in the discussions.

I look forward to dialogue and collaboration with all of you on this exciting journey!

Conflict of Interest Disclosure:

1. I'm part of the core team of Ethereum Lima.
2. I'm part of the team of Defonomics Labs.

Note:

I would like to emphasize that I greatly value the diversity of perspectives. If you have a different vision than mine, I invite you to share it. I firmly believe that the exchange of ideas enriches the collective and contributes to building a more accessible and decentralized governance.
