

Create New Content

How to craft new content on Dune

Dive into the world of Dune and explore the myriad of content creation possibilities it offers. This guide will walk you through the various types of content you can craft on Dune and the steps to bring them to life.

Crafting Queries, Dashboards, and Datasets

1. Navigate to the “+Create” button located at the top of the page.
2. From the dropdown, you have the option to:* Initiate new queries.
3.
 - Design new dashboards.
4.
 - Upload on-chain or off-chain datasets as per your requirements.

Once uploaded, your datasets can be found under the “Your Data” section within the data explorer.

Submitting Contracts for Decoding

If you're keen on analyzing a contract or project that hasn't been decoded yet on Dune, here's what you can do:

1. Submit the contract for decoding.
2. Once submitted, the automated decoding process kicks in.
3. After a brief wait, your decoded contract will appear under the “Decoded Projects” category.

Create Visualization Widgets

You can create visualization widgets from any existing query results, but clicking the “New visualization” button and choosing the type of charts you want. Of course you can customize the charts to your liking.

Forking Queries

If you stumble upon a query that almost meets your needs but requires a few tweaks:

1. Click on the “Fork” button located in the upper right corner.
2. Modify the forked query as per your requirements.

Harness the power of Dune to create, visualize, and analyze. Happy crafting!
