

Add gnark to your project

Prerequisites

- [Install Go](#)
- .

Installgnark

gnark is a standard Go module, install it using the following command inside your Go module:

`go get github.com/consensys/gnark@latest` note If you use Go modules, `ingo.mod` the module path is case sensitive (use `consensys` and not `ConsenSys`). info gnark is optimized for amd64 targets (x86 64bits) and tested on Unix (Linux / macOS).
