

# bor\_getCurrentProposer

Returns the the current proposer's address.

For Growth and Custom service plans This JSON-RPC method allows a request to be forwarded to a partner service provider if Infura should experience a service issue or outage. See [Failover protection](#) and [Enable API request forwarding](#) for complete details.

If you would like failover protection but don't qualify under your current plan, then either self-upgrade to the Growth plan or contact a sales representative to upgrade to a Custom plan.

## Parameters

None

## Returns

string : Address of the current proposer

## Example

### Request

- cURL
- WSS

```
curl https://polygon-mainnet.infura.io/v3/YOUR-API-KEY \-X POST \-H "Content-Type: application/json" \-d '{"jsonrpc":"2.0","method":"bor_getCurrentProposer","params":[], "id":1}' wscat -c wss://polygon-mainnet.infura.io/ws/v3/YOUR-API-KEY -x '{"jsonrpc":"2.0","method":"bor_getCurrentProposer","params":[], "id":1}'
```

### Response

```
{"jsonrpc":"2.0","id":1,"result":"0x88c5e96c1459d224383dcb1fe0cedd1fcee25ffb"}
```
