

Since I'm both on the Grants Council and a delegate voting on missions, I started to see a few proposals and authors overlapping missions and grants. I'm listing the proposal, authors or team members overlaps I found here on this post.

I am not aware of any rule where they should not apply to both, this list it's just a cross-reference between what's happening on Charmverse with grants and what's happening on missions here in the forum.

If you come across an overlap that is not here please let me know and I'll add it. I provide this information here for the community and teams to do whatever they see fit.

If any of my "comments" on the table it's wrong please let me know.
