

Hi all,

With some other nodes also entering end of life, I think this is a good time for SCRTIsland to also go offline. I will be shutting it down this week, so please re-delegate.

Secret is a great network of decentralized players and teams, so I will not recommend any one node - but can say I've always received help and support from Stake or Die, Secret Saturn, Whispernode and SecretSauce among others.

Thank you for your support, and confident Secret will keep bringing an important data privacy layer to blockchain and web3.

-SCRT Island
