

Gm from the Chorus One team!

Chorus One is one of the biggest and most active staking providers globally, operating infrastructure for over 40+ Proof-of-Stake networks including validating many Cosmos chains.

Since 2018, we have been at the forefront of the PoS industry and now offer easy enterprise-grade staking solutions, industry-leading research, and also invest in some of the most cutting-edge protocols through Chorus Ventures, a \$30M fund. We're a team of over 50 passionate individuals spread throughout the globe who believe in the transformative power of blockchain technology.

Through Chorus One Ventures we've been actively supporting the Cosmos ecosystem and many of its builders from an early stage. As such, we've also taken our governance duties seriously and Chorus One has been one of the [most active validators on networks where on-chain governance has been enabled](#).

dYdX has been a trailblazer within the Ethereum ecosystem, innovating to build one of the most powerful perpetuals trading platforms. We're excited to support dYdX v4, which is bringing a fully decentralized, standalone blockchain to the equation and becoming new governance stakeholders in the ecosystem. The Chorus one research team has also been working closely with the dYdX team to develop MEV mitigation strategies for the dYdX v4 chain. Read more about our grant [here](#).

Chorus One is here to support the upcoming launch and we're looking forward to continuing contributing to dYdX and the Cosmos ecosystem.
