

This is my point of views may be you not agree with , I think all those users who traded ever in uniswap before airdrop announcement should get airdrop , like I traded 5 sep 2020 but I never knew that there will be an airdrop for Uniswap users but all those who traded before 1st Sep got Free tokens but we did not , if we did not get then I think who traded before they also should not get any free tokens , because we used same like they used so we should also treated equal to them

Thanks
