

TITLE

: Grant for Let's Get HAI Codebase Audit

AUTHORS

: Ameen Soleimani, Reza Jafery, contributors at Reflexer and Let's Get HAI

PURPOSE

:

We are seeking a full or partial grant to cover security audits of the codebase for Let's Get HAI.

Let's Get HAI is a fork of RAI on Optimism, with the key difference of having multiple forms of collateral available rather than just ETH (including stETH!) HAI, like RAI, is an over-collateralized CDP-minted stablecoin that is free-floating rather than pegged.

SUMMARY

:

We are seeking to receive a full or partial grant to conduct an audit of HAI's codebase by Solidified (\$66K), and a supplementary Audit by Alexey Pertsev (\$30K) for \$96,000 total.

Whatever grant amount can be provided by Lido will be greatly appreciated! Thank you for considering our proposal.

DETAILS

:

The audit is projected to commence in August 2023 and is expected to conclude by the end of October 2023. Our expenditure estimate for this project is solely the cost of the two audits, amounting to \$96,000.

Solidified Audit - \$66,000

Alexey Pertsev Audit - \$30,000

Let's Get HAI
