

Hey dYdX Traders,

Something different from the usual tech-heavy talk to dive into something a bit more personal.

We're curious:

1. The Spark

: What lit the fire under you to start trading? Was it inspiration, desperation, or a bit of both?

1. The Grind

: Tell us about the grind, the sweat, the 'almost-threw-my-laptop-out-the-window' frustrations. Were there moments you thought of quitting, and what kept you going?

1. Profit Tales

: Are you consistently profitable? Was there a 'eureka' moment, or is it the result of relentless trial and error?

1. Strategic Gold

: What's the best strategy you've unearthed in your trading journey? The one you wish you'd known when you first started.

1. Wisdom for the Road

: Drop some truth bombs. What do you know now that you wish you'd known then?

1. Rewind

: If you could hop in a time machine, what would you change about your trading approach from the start?

1. Discovering dYdX

: How did you stumble upon dYdX, and what hooked you in? Was it love at first trade, or a slow burn?

1. dYdX Wishlist

: What's one thing you enjoy on centralized exchanges that you'd love to see integrated into dYdX?
