

I'm just working on an AIP and I would like to include a mechanism for getting community feedback post-funding. Simply, I'd like the community to rank ideas/suggestions in a friction-free low risk way.

Example poll:

"Where would you like the action to take place?"

the mountains

a space station

mars

under the sea

Example of capturing ideas:

"What name would you give to X?"

[Free form text box]

Is there a tool that's been used before that worked well? I don't want to reinvent the wheel if there's something people are used to using (perhaps there's something built into Discourse?). Including the specifics in the AIP will hopefully make it clearer how the community can be involved.
