

Hello Lido Community,

I am representing [LawyerD](#), an automated copyright protection service specializing in safeguarding intellectual property rights across various domains, including NFTs and cryptocurrencies. Our team has extensive experience in detecting and facilitating the removal of intellectual property infringements, and we would like to bring this expertise to the Lido ecosystem.

In our routine scans, we've identified an alarming issue concerning the Lido brand. We have discovered three fake websites posing as [Lido.fi](#) that currently rank on the first page of search results on Google and Bing. These fraudulent sites not only sow confusion among your existing and potential users, but they also pose a serious risk to Lido's financial integrity and reputation.

Given the seriousness of this issue, we propose a strategic partnership with Lido. Under this partnership, we will apply our proprietary technology and expertise to eliminate these fake websites and any other potential intellectual property infringements that may arise in the future. Our service is prompt and efficient, underpinned by a dedicated team of professionals passionate about maintaining the integrity of digital spaces.

We believe this partnership can significantly enhance the security and trustworthiness of the Lido platform, ultimately benefiting your user base and contributing to the overall health of the crypto ecosystem.

We are open to discussing this proposal in more detail and aligning our capabilities with your needs to combat fraudulent activities more effectively. Looking forward to the community's thoughts on this matter.

Thank you for your consideration.
