

I qualified and claimed on 3 different addresses, but I have only received 1/3 of my airdrop to my MM. The dym portal site says MM is not installed, but it definitely is.

I claimed my TIA, ATOM, and Solana addresses, but have only received the smallest of the three allocations.

I expected to find the dym in Keplr, where I stake my TIA and ATOM, but nothing so far.

Is there a way to reverify that I claimed properly? Is anyone else having issues like this?
