

Hey guys, we just launched an [initiative](#) to supercharge the NIST Elliptic Curve seeds bounty. The aim is essentially to find the pre-image for the P256

seed c49d360886e704936a6678e1139d26b7819f7e90

(note that [EIP-7212](#) introduces a P256

(a.k.a. secp256r1

elliptic curve) precompile) given the major hint in the original bug bounty [announcement](#):

Let's show the world that Ethereum is a collective power of folks who truly care about what essentially powers the foundation of Ethereum: cryptography.

A major shoutout to [@merkleplant](#) who has been the driver behind this initiative! Would appreciate spreading this initiative & any donations are ofc welcome
