

I'm trying to send block submissions to the [flashbots relay](#), and I'm getting a 202 response code with a body like {cs:0xc02d2ba000}.

My builder is configured to submit 4s into the block every 1s.

However, when calling /relay/v1/data/bidtraces/builder_blocks_received

, I'm only able to find my pubkey in here very rarely. (not able to find my pubkey most of the time)

Are there any restrictions on the submissions?
