

From what i've figured out from fairly sparse information.

1.  $0-.05$  = sell  $0.5-1$  (buy) though I don't think you can submit a 0 or a 1, it has to be a floating point between the two. 0.5 is neutral.
2. It's for basically the next week, you submit at the weekend for the coming week, that's how long the signals are supposed to be for.
3. For signals, it's distinct from the tournament, you have to submit at least 10 tickers. The tournament, seems to want the entire universe, but i'm unsure, that's actually a question i have.
