

Web3Auth PnP Flutter SDK

Web3Auth provides a [Flutter SDK](#) written in Dart. It is a client-side library you can use with your Flutter app to authenticate users using Web3Auth. It returns a private key generated in a non-custodial way on successful user authentication. This authentication is achieved by using any of the supported social logins Web3Auth provides or using a custom authentication flow of your choice.

This Documentation is based on the 3.1.6

SDK Version. [a](#)

Requirements

- Android
- API version 34 or newer.
- iOS
- 14+, Xcode 11.4+ / 12.x and Swift 4.x / 5.x
