

With the Bedrock vote beginning soon, I want to make everyone aware that Optimism Token House governance is live on Tally!

You can use Tally to:

- Research Token House delegates
- Delegate the voting power of your OP tokens
- Monitor the progress of governance proposals & analyze voting results
- Vote on governance proposals

Tally is the most popular user interface for on-chain governance. We are the preferred on-chain governance solution for many of the large DAOs within the Ethereum ecosystem such as Uniswap, Gitcoin, ENS, Compound, and Hop.

I included a few screenshots below to give you a sense of what you can expect from Tally's user interface.
