Delegate Statement

FranklinDAO is a student-run DAO composing of students at the University of Pennsylvania, and is one of the most active blockchain university orgs in the world. We look forward to playing a direct role in the on-chain governance of Uniswap, publishing research, running speaker events, and being the interface for college communities to access the bedrock infrastructure of a new and more equitable financial system.

We are deeply committed to preserving defi's core values, and will gear our voting decisions based on:

1) Transparency

Committed to ensuring transparency of the protocol, and transparency

about our decision-making process. We are committed to acting independently

without external influence from third-parties. Penn Blockchain is always open to answering questions related to our votes on proposals.

2) Sustainability

We are committed to ensuring the long term sustainability and health of the DAOs we participate in and aim to help them steward their native protocols in perpetuity.

3) Inclusivity

Forging the best ideas requires diversity, fairness,

and education

, and we will strive to encourage these.

We want to make your voice heard! Please consider delegating to Penn Blockchain if you resonate with our mission.
