

PROPOSAL NAME:

Single Seat Nominees - A More Competitive Election Pool

PROPOSAL CATEGORY:

Process

ABSTRACT:

In the interest of concentrating the competitiveness of each election pool, this proposal would limit ApeCoin DAO election nominees to run for one single position per election cycle.

BENEFIT TO APECOIN ECOSYSTEM:

By ensuring that a nominee may only apply to run for a single position in a given election period, we would see greater selectivity by candidates as they opt for the position that plays to their greatest strengths. This has the effect of enriching the overall talent pool for each position, as well as reducing crucial administrative overhead.

STEPS TO IMPLEMENT & TIMELINE:

Upon the passing of this proposal, all subsequent elections would permit a nominee to apply exclusively for a single elected position. Implementation would be enacted immediately.

OVERALL COST:

This proposal costs zero ApeCoin.
